About Me

As a creative problem-solver, I'm drawn to the world of software engineering. I love designing intuitive user interfaces that not only look great but also provide a seamless user experience. I'm eager to contribute my design skills to a dynamic development team.

EXPERIENCE

Ecommerce website: Popeyes clone (3 members, score: 8)

This project is an e-commerce website developed using HTML, CSS, and JavaScript. It features a user-friendly interface with essential functionalities such as product display, shopping cart, order management, and user registration/login.

Management system - Smartphone Store (4 members, score: 8)

This project is a Java-based inventory management system for a mobile phone store. Using Java Swing for the user interface and SQL Server as the database, the system provides features such as product management, sales management, inventory tracking (by IMEI number), user authentication, and role-based access control.

Ecommerce website: Pizza Hut clone (5 members, score: 9)

This web application is designed to automate the processes of a pizza restaurant. Developed using a combination of HTML, CSS, JavaScript, PHP, and SQL Server, the system offers a user-friendly frontend for customers to place orders and a backend for store owners to manage operations. Key features include an online menu, shopping cart functionality, order tracking, inventory management, and sales reporting.
